

ODIAPRENEUR 3.0 · SMART ODISHA HACKATHON

AaaS · Accessibility as a Service

Accessibility infrastructure for public institutions: Odisha first, India next

**TEAM
SUBARNAREKHA**

Pratikshya Padhi (Class XI)

Odisha Adarsha Vidyalaya, Jamdhar

Theme: Accessibility, Ecommerce & Cyber Security

One button. Any government website. In Odia, by voice.

THE PROBLEM

English-first websites

Notices and forms in English and heavy official language

Scanned notices

Circulars are photos of paper: screen readers see nothing

Typing-only forms

Elderly people and shaky hands are locked out

3.75 cr

Speak Odia as their mother tongue

27%

of Odisha aged 7+ cannot read

4.2 cr

people in Odisha

2.68 cr

Indians live with a disability

Source: Census of India 2011

SIX TOOLS BEHIND ONE BUTTON

ଠାକୁ ଶୁଣାଅ

Read aloud

Reads the page in a natural Odia voice, highlighting each line. Says numbers correctly.

ଅନୁବାଦ

Translate

The whole page turns into Odia in place. Dates and amounts stay exact. One tap undoes.

ସହଜ ପଢ଼ା

Easy Read

Officialese becomes simple words: "furnish the requisite documents" → "give the papers".

ଦଲିଲ ପଢ଼

Read document

Reads scanned notices and PDFs, shows them in Odia beside the original, and reads them aloud.

କହି ଲେଖ

Speak to fill

Asks each form question aloud in Odia and writes your answer. Never presses Submit for you.

କହି ଚଳାଅ

Voice command

Say where to go, like "ବିଜୁପୁର", and it opens the link. When unsure, it shows choices.

Any website

One line of code, or our Chrome extension

ଅ widget

Six tools, Odia labels first

Gateway

One key per institution

4 AI services

IndicWav2Vec · IndicTrans2 · MMS-TTS · Tesseract

No cloud

Data stays on the government's server

Offline

Runs on one ordinary laptop

Open source

Apache-2.0, no licence fee

Tested live

On real Odisha gov sites

Scan for the code
